

Plant Disease Analysis Report

Generated on: 2026-01-08 20:16:36

Analysis Results

Plant Disease Details	Value
Detected Disease	Tomato_Late_blight
Confidence Score	84.60%
Plant Type	Tomato

Treatment Recommendations

Category	Recommendations
Chemical	Copper hydroxide/oxychloride
Chemical	Chlorothalonil
Chemical	Cymoxanil + Mancozeb or Mandipropamid (rotate modes of action)
Biological	Remove infected plants and destroy them
Biological	Improve air circulation
Biological	Avoid wet leaves overnight
Preventive	Plant resistant varieties
Preventive	Use proper spacing
Preventive	Water at the base of plants
Market_Products	Copper hydroxide 77% WP (e.g., Kocide)
Market_Products	Chlorothalonil 75% WP (e.g., Daconil)
Market_Products	Cymoxanil 8% + Mancozeb 64% WP (e.g., Curzate M8)
Market_Products	Mandipropamid 23.4% SC (e.g., Revus)

Note: This report includes AI-powered analysis using advanced plant disease recognition technology.
